LIMITED WARRANTY

Form #A801

Fort Madison, Iowa 52627. Printed in U.S.A.

Targa by Sheaffer stands among the finest writing instruments in the world. Every Targa carries the "White Dot", Sheaffer's symbol of quality craftsmanship for over 60 years.

Whether it's given or received, a Targa by Sheaffer owner can be proud because the precision design and elegant fashion signify the owner has made his mark.

Targa by Sheaffer is available in four writing systems, fountain pens, markers, ballpoints and pencils. Targa writing instruments come in brushed stainless steel, sterling silver and 23K gold electroplate and a choice of straight line or geometric design.

How to care for your precious metal writing instruments. You should treat these precious metal writing instruments in the same manner you would treat any piece of fine jewelry or silverware.

In order to keep your gold electroplate or sterling silver writing instruments looking like new, we suggest you periodically do one of the following:

- Purchase a rouge cloth from your jewelry store, and rub the entire writing instrument gently. With a clean moist cloth, wipe off any residue. The original luster will reappear in minutes.
- Use a small amount of jewelry polish (available at fine jewelry stores) on a soft cloth. Rub gently. With a clean moist cloth, wipe off any residue.

Targa by Sheaffer Fountain Pen and Marker

The Fountain pen has a convertible filling system

To fill from a bottle: With converter in place, unscrew barrel and immerse point of pen in Skrip® ink. Squeeze converter spring lever two or three times. Wait five seconds before removing point from fluid. Replace barrel.

Skrip® cartridge fill: Unscrew barrel and insert cartridge (either end first). Screw on point section to engage. On first fill of new pen,

squeeze cartridge gently to ease fluid into point. Replace barrel. Do not attempt to push cartridge directly onto the writing unit. Skrip® bottled ink and cartridges are available in seven colors.

Fountain pen and marker caps differ to the touch for easy selection in your pocket.

Strong resilient spring clips.

Converts for cartridges or bottled ink.

Inlaid 14K gold or stainless steel nib with Ruthenium ball offers smooth writing and long life.

Fountain pen available in extra fine, fine, medium and broad points.

Marker features exclusive Tektor refill that writes through carbons.

Caps lock to barrel with a quiet, sure snap.

The marker is easy to refill.

Unscrew barrel and remove old cartridge. Replace with an exclusive Tektor tip refill: "The hard tip that writes soft." Replace barrel. Tektor refills are available in blue, black, red or green.

Targa by Sheaffer Ballpoint and Pencil

Ballpoint and pencil caps differ to the touch for easy selection in your pocket.

Strong resilient spring clips.

Hidden, replaceable eraser and convenient lead storage space.

Split tube clutch for positive lead adjustments.

Ballpoint uses precision twist action mechanism for silent, durable action.

To replace Ballpoint refill: Pull off cap. Unscrew collar and remove old refill. Insert new refill. Screw on collar and replace cap.

Ballpoint refills are available in medium and fine points in blue, black, red or green.

Precision pencil loading. Hold barrel and turn clockwise until all lead is expelled and metal rod appears at point. Then turn back completely.

Insert lead and press gently against a hard surface to seat lead in clutch. A wide choice of leads is available.

Tungsten Carbide ball refill assures smooth writing that starts without skipping.
